

AI in software development your team will *actually use*

Testing *Fantasy*

Live, hands-on workshops on **AI across the software lifecycle**: RAG, data quality and AI agents. Face-to-face or online, **facilitated by Paula personally**, in a cloud lab that is ready before your team joins.

THE WORKSHOPS

Testus Patronus

The Art of Contextual AI · RAG

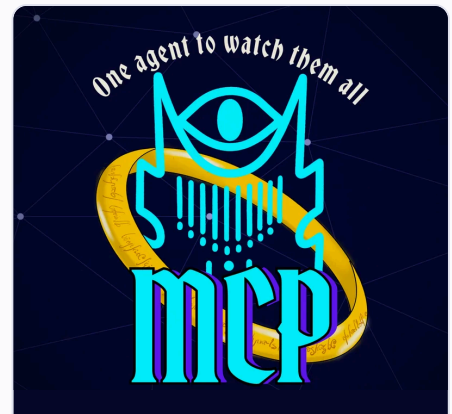

Build a RAG assistant on your own
requirements, test cases and
documentation.

Data Avengers Endgame

ETL testing · data quality for AI

Build data pipelines and automated
validation for the data behind your AI.

One Agent to Watch Them All

The Fellowship of AI Agents

Build AI agents that watch, analyse and
alert on your testing processes.

ONE FEE, THE WHOLE TEAM – PRICED PER SESSION, NOT PER HEAD

3 HOURS

Half-day workshop

€2,800 per session

€117 per person with a full room

Any workshop from the catalogue. Cloud
lab and all materials included.

BEST VALUE

1 DAY

Full-day workshop

€4,000 per session

€167 per person with a full room

The half-day plus deeper labs, Q&A on
your own codebase and follow-up notes.

MULTI-SESSION

Custom programme

from **€6,000**

Quoted per programme

Curriculum and lab built around your
stack, across teams, with progress
reporting.

Up to 24 people per session · Prices exclude VAT · Travel billed at cost for on-site sessions

WHY TEAMS BOOK IT

- **No setup time.** The lab is up before your team joins.
- **Real systems.** A live lab against a real system under test.
- **Made to be remembered.** Engineering wrapped in a story.

Paula Bassagañas designs and runs every session. IT
Architect overseeing AI in the SDLC, international conference
speaker.

WHAT ATTENDEES SAY

“We really liked it. Combination of theory and hands on
exercises. Very good presentation skills.”
